August 9th, 2012

To: Mr. Wayne Western

Utah Division of Oil, Gas & Mining – Salt Lake City, Utah – cc Mr. John Reay BLM –Hanksville, Ut.

From: Avraham Azoulay – Manager

Mr. Western,

Please accept this revision to our approved permit N.O.I. dated August 31st, 2011 concerning permit

S/017/0031 – Bromide Basin. We have discovered a clerical error in proper location concerning accurate section description in township 31 south of range 10 East. The previous N.O.I describes the project workings in section 35. Actual workings are located in section 34, as the revised N.O.I. now reflects.

A copy of the revision has been given to Mr. Reay of BLM at the Henry Mountain field office here in Hanksville, Utah.

Thank you very much sir for your time and considerations,

Best regards,

Avraham Azoulay

2. Location and Operations maps must be plotted at a scale to accurately identify locational landmarks and operations details. All maps must include a north arrow, scale, appropriate labels, and title box including the mine name, township, range and section.
- a. The general location map must be the scale of a USGS 7.5 minute series map or equivalent (1"=2000') and identify new or existing access roads.
- b. The operations map (1"=200' or other scale as determined necessary by the Division) must be labeled and identify:
- The area to be disturbed;
 - The location of any existing or proposed operations including access roads, drill holes, trenches, pits, shafts, cuts, or other planned activities; and
 - Any adjacent previous disturbance for which the operator is not responsible.
- (Contact the Division for a list of consultants and land surveyors for mapping assistance.)

3. The proposed (5 acre or less) disturbed area (including access/haul roads) should be marked in the field ON THE GROUND with metal T-Posts (or with some other marker of equal effectiveness). Markers should be appropriately spaced so that the next marker in either direction is clearly visible with the naked eye.
